

December Notes

As we come to the end of another year we look back and wonder how the year could be coming to an end. It seems each year slips past faster than the year before. We have seen a few changes as we have reopened after the pandemic. The need to take care with regard to virus cotangent remains but life is returning to normal. The shut down did cost us a number of players and I want to thank our teaching program for gaining the interest of some newer members. Of note the Wednesday night coaching game has been running well with 4 tables. We had about 20 people take a class on defence. There is also a plan to offer another beginners class. These efforts are the club's life blood and offer hope new players can be recruited.

The first week of December will be a district STAC. , offering increased master points. Silver points will be available.

The annual phone book should be ready by the beginning of the year. This is largely because of the effort of Mark Reineke who has taken on the work required to get it printed this year. We have not been able to find anyone willing to take on all the roles of Club Manager so we continue to find members to do various parts of the role.

Thank you to Unit 575 who have arranged for the Monday team games on the last Monday of each month to be designated as Unit Championships and so offer increased master points.

On-line games continue. Games and changes are updated on our club website where Larry Custead has been doing a great job for us.

Keep warm and lets strive to get increased table counts for next year. Even the increase of the one table per game would be welcomed. Slow steady growth is the key to the club's future.

Have a Merry Christmas and lets get ready for a successful 2023.
